

## sponsoring TEMPERATUZ, 16-17 June 2016, Rome

BCUBE air cargo is proudly sponsoring “Temperatuz”, first Italian End to End Pharma Logistics event that will take place in Rome the 16th and 17th June, 2016 with particular focus to pharmaceutical handling at the airport.

As 3<sup>rd</sup> in the world IATA CEIV certified operator, and after the opening of our new Pharma Centers in Malpensa and Fiumicino, BCUBE air cargo has become an important qualified referent for the Italian pharmaceutical sector. The last step into BCUBE pharma pioneering world was its admission to the IATA TTTF as new member.

First on the Italian ground handling agents field, BCUBE air cargo has been changing the scenario in the pharmaceutical handling at the airport.

Thanks to Temperatuz, eventually the producers will have the chance to better understand that the airport is not a supply chain “black hole” but an important platform that completely satisfy their quality requirements.

It was a very important achievement to prove that we were “talking” the same quality language.

We proudly embraced the Temperatuz event as it will be Europe’s number one network for professionals interested in practical and thought engaging discussions involved with the pharma industry.
